

Steps to install the GUI Builder Editor

- A) Open your Eclipse.
- B) Clicked on Help->Install New Software
- C) Paste this link in "Work with" text box:
org.eclipse.wb.releng.update.site - <http://download.eclipse.org/windowbuilder/latest/>
- D) WindowBuilder is shown in the box below. Check it
- E) Click next and followed the wizard
- F) It takes a while to load it.
- G) Once successful it will ask you to restart Eclipse
- H) Now, you will see the icon for WindowBuilder on top left corner. Second icon from left.
